Submissions on managing future growth to close

Communities have a few days left to express their views on how the ongoing growth in the western Bay of Plenty is to be managed over the next 30 years.

Consultation on SmartGrowth's Future Development Strategy and Tauranga City Council's Urban Strategy closes on Monday 5 November.

People can complete an online survey or fill out the submission form, both of which are on the SmartGrowth website www.smartgrowthbop.org.nz

The SmartGrowth Leadership Group will consider all the submissions, survey results and views expressed through the five community meetings held in October. Members will look at the various opinions in deliberations later this year and early next year before finalizing the two documents. Tauranga City Council's Transformation Committee will also consider submissions made specifically on the Urban Strategy.
